Have total of 2.11 years of experience in Software Testing with the designation of Software Test Engineer at Wells Fargo, Bangalore with working experience on Functional testing (Agile scrum) and VB Script – UFT/QTP automation tool along with DB.

PROFESSIONAL SUMMARY:

- Ø Very good knowledge on Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC), Defect Life Cycle (DLC) and Agile methodology (Scrum).
- Ø Expert in Test Scenarios and Test Cases development and also mapping test case with requirement.
- Ø Have good working experience in different types of testing like Functional testing, Integration testing, Smoke testing, Regression Testing, Ad-hoc Testing, Exploratory Testing, GUI and Database testing.
- Ø Good knowledge in working on SQL queries.
- Ø Involved in logging defect into HP ALM, and generating report on a daily basis from ALM, send it to the Client and also have good working knowledge on JIRA tool.
- Ø Very good at team co-ordination and collaboration.
- Ø Have working experience with 3190Z Hand Held device (RFID) testing.
- Ø Good knowledge on VB Script and UFT/QTP automation tool.
- Ø Involved in preparation of test data, RTM and also done Object Repository preparation.

SOFTWARE SKILLS:

Operating Systems / Environment	: Windows (7.0/10)
Software Languages	: Core Java, VB Script
Databases	: Oracle , SQL Server
Test Management Tools	: HP ALM, JIRA and LASSI
Automation Tools	: UFT / QTP

ACADEMIC QUALIFICATION:

- Ø Completed BE in Computer Science from Ghousia College of Engineering (GCE), Ramanagaram in 2014 with 65%.
 - Ø Did PUC and Schooling from Karnataka Board with 66% and 73% respectively.
-

PROJECT DETAILS:

Project Name: TCAM (Sales Force)

Client: Wells Fargo.

Start Date: October 2017 to till date.

Testing Tool used: HP ALM, LASSI, SQL Server, Sales Force and Functional testing.

Role & Team Size: Functional with DB tester, Team Member-20.

DESCRIPTION: TCAM (Tax Credit and Asset Management) is a division of Wells Fargo whole sale banking. Wells Fargo group is responsible for Asset Management servicing of LIHTC (Low Income Affordable Housing Tax Credit) Investments within community lending investment. It mainly deals with Assets management and benefits and also reporting.

RESPONSIBILITIES:

- ü Analysis of requirement document and development of test scenarios and test cases (UI, Functional, Integration, System and Data Base) based on analysis done and also involved in peer review.
- ü Executing UI, Functional, Integration and Regression test cases, preparing Defect/Issue document and provide daily status update to Test Lead.
- ü Validate data with the data base (SQL server) as per scenarios, writing the Query and updating the existing queries.

- ü Modifying the Test Scenarios and Test Cases based on the newly added customer requirement or RC's.
- ü Involved in the uploading test case to HP ALM, exporting test case from HP ALM, updating testing status (Pass/Fail/Blocked) based on the test execution results. Logging new Defects/Retest the defect and updating retest status in the HP ALM.
- ü Have working experience with LASSI (Lifecycle Application Salesforce Systems and Integration).

Project Name: D2C RFID

Client: MACY's, USA.

Start Date: April 2015 to October .2017

Testing Tool used: HP QC/HP ALM, JIRA, Remote Desktop Server, SQL Server, Oracle, Manual Testing & UFT/QTP with VB Script.

Role & Team Size: Manual and Automation Testing using UI and Database, Team Member-26.

DESCRIPTION: The main objective of the D2C RFID is to perform the different scans (BTF – Back To Front, TUT – Tag Up Tool and CC - Cycle Count) by using 3190Z - Hand Held device in the required Macys or Bloomingdales stores, based on the requirement and verifying the data flow between the RFID device and all the RFID reports and Applications and also with data base.

RFID mainly works with 2 applications (DVN Manager and SP Manager) and 8 reports (Balancing and Control, Associate Productivity, All In One report, TUT report, TrueVUE (Tyco), Display Audit Report, Back To Front report and BTF application) .

RESPONSIBILITIES:

- ü Analysis of requirement document and development of test scenarios and test cases (UI, Functional, Integration, System and Data Base) based on analysis done and also involved in peer review.
- ü Executing UI, Functional, Integration and Regression test cases, preparing Defect/Issue document and provide daily status update to Test Lead.

- ü Validate data with the data base (SQL server, Oracle) as per scenarios, writing the Query and updating the existing queries.
- ü Modifying the Test Scenarios and Test Cases based on the newly added customer requirement or RC's.
- ü Involved in the uploading test case to HP ALM, exporting test case from HP ALM, updating testing status (Pass/Fail/Blocked) based on the test execution results. Logging new Defects/Retest the defect and updating retest status in the HP ALM.
- ü Have working experience with JIRA (defect management rules) by adding Tasks for requirement clarifications and also raising some of the issues as Bug.
- ü Prepared test data based on the requirement of the applications and also involved in the preparation of the Object Repositories along with RTM.
- ü Task allocation, resource planning, preparing Daily Status Report (DSR) and updating Weekly Status Report (WSR) to onshore in the absence of Test Lead.

AWARDS AND ACHIEVEMENTS:

- Got gold medal by participating in 7th International Level Science Talent Examination by taking 4th rank in district level.
 - Received math's excellence award by attending math's talent examination.
-

Certification: Certified on “**Software testing**” from “**Q-spiders**”, Software testing training institute.

PERSONAL DETAILS:

Name	: Priyadarshini B.S
Nationality	: Indian
Father's name	: Mr. Somashekar
Mother's name	: Mrs. Gangamma B.S
Husband name	: Mr. Arun Kumar B.N
